Engineering**
University of Tennessee,
Knoxville

PROFESSIONAL SUMMARY

Web Developer with experience building, maintaining, and optimizing production websites across WordPress, front-end development, integrations, analytics, SEO, and digital platform operations. Skilled in HTML, CSS, JavaScript, PHP, responsive development, REST APIs, GA4, Google Tag Manager, and third-party integrations. Experienced supporting multi-site web environments, developing custom functionality, troubleshooting production issues, and improving site performance. Electrical Engineering graduate with a strong software and systems foundation and experience working in regulated healthcare environments.

WORK HISTORY

Navista - Web Developer / SharePoint Administrator

Nashville, TN | 09/2023 - Current

- Develop, maintain, and optimize a portfolio of production websites across WordPress and enterprise digital platforms, supporting front-end development, integrations, analytics, and ongoing web operations.
- Build and customize responsive web experiences using HTML, CSS, JavaScript, PHP, WordPress, Elementor, and reusable component-based workflows.
- Manage GA4, Google Tag Manager, consent management, technical SEO, performance, accessibility, redirects, tracking, and related production configurations across multi-site environments.
- Integrate and troubleshoot REST APIs, forms, payment systems, plugins, and third-party services using browser developer tools, logs, and platform tooling.
- Partner with marketing, operations, vendors, and technical stakeholders to translate business requirements into production web solutions within regulated healthcare environments.

Dire Wolf Consulting, LLC - Web Developer

Remote | 08/2022 - 09/2023

- Developed and maintained responsive client websites and web applications using HTML, CSS, JavaScript, WordPress, and REST API integrations.
- Built and customized front-end interfaces, reusable components, and site functionality based on client requirements and user experience goals.
- Integrated front-end experiences with backend APIs and third-party services while troubleshooting data, configuration, and compatibility issues.
- Diagnosed browser, performance, and integration issues while delivering updates across multiple concurrent client projects.

The VanLeuven Company - Web Developer

Nashville, TN | 10/2021 - 06/2022

- Developed responsive client websites using HTML, CSS, JavaScript, and WordPress.
- Customized WordPress layouts, styling, and site functionality to meet client requirements and improve usability.
- Configured domains, DNS, hosting environments, and production deployments while troubleshooting front-end and configuration issues.

Clean.io - Computer Systems Engineer

Remote | 08/2019 - 06/2022

- Investigated and reproduced malicious redirects, injected scripts, and unexpected browser behavior affecting production web properties.
- Analyzed HTTP traffic, requests, redirects, and application behavior using Charles Proxy, browser developer tools, logs, and network debugging techniques.
- Inspected JavaScript execution and third-party web activity to identify sources of malicious or unwanted behavior.
- Collaborated with engineering teams to reproduce issues, document findings, validate fixes, and confirm production stability.
